## TOOLS REQUIRED FOR INSTALLATION:

- Spanner 10mm
- Socket 10mm
- Socket 13mm
- Long socket extension

# FITTING INSTRUCTIONS

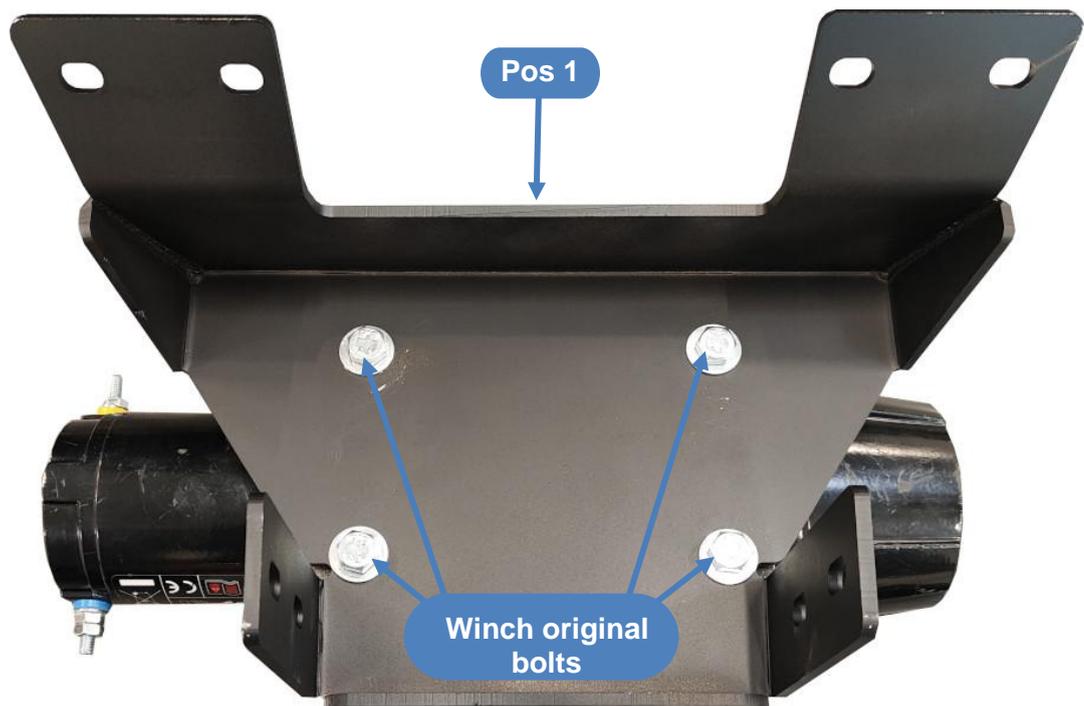

## Step 1

Install fairlead to the fairlead holder (Pos. 3), using fasteners from winch kit. Next place winch into the fairlead holder.

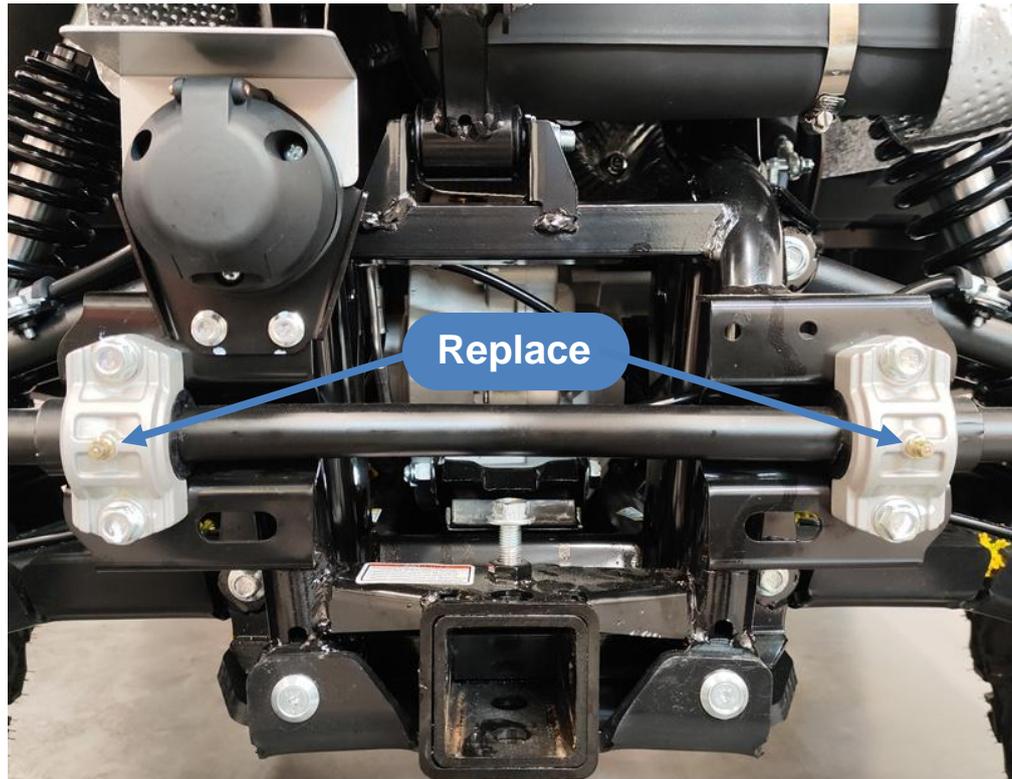

## Step 2

Install winch together with the fairlead holder to the adapter (Pos. 1). For fastening use fasteners from winch kit.

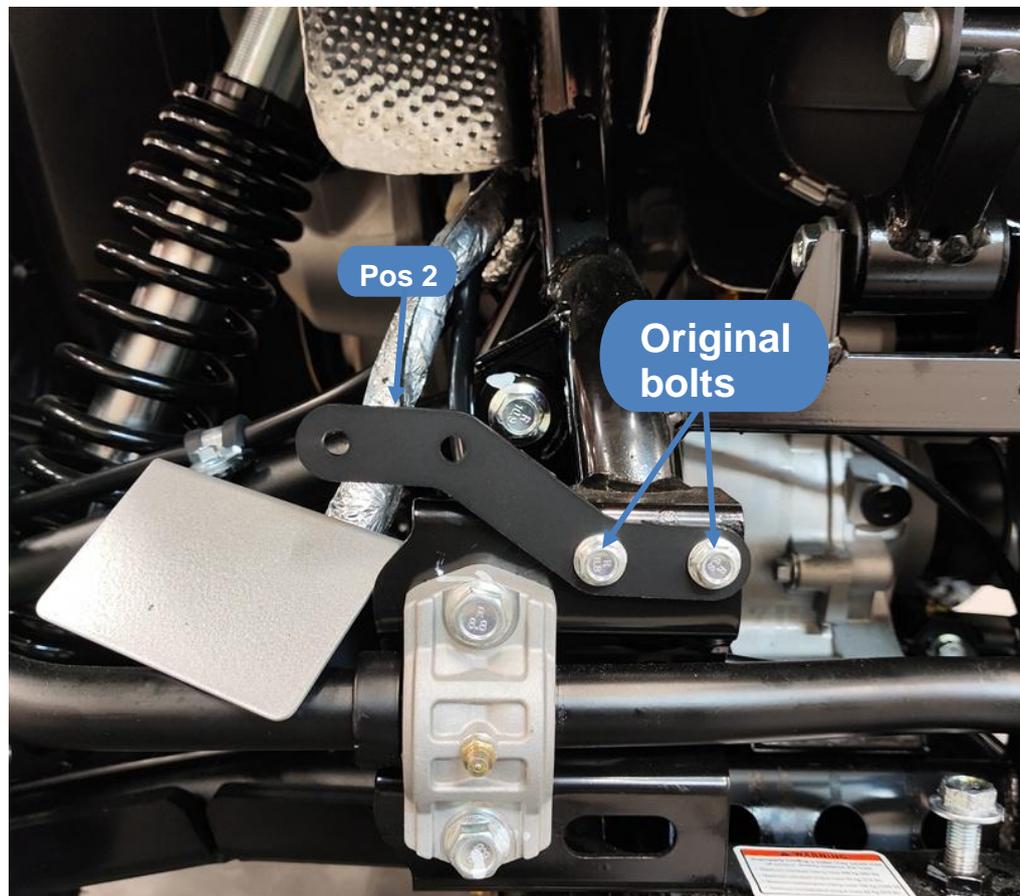

### Step 3

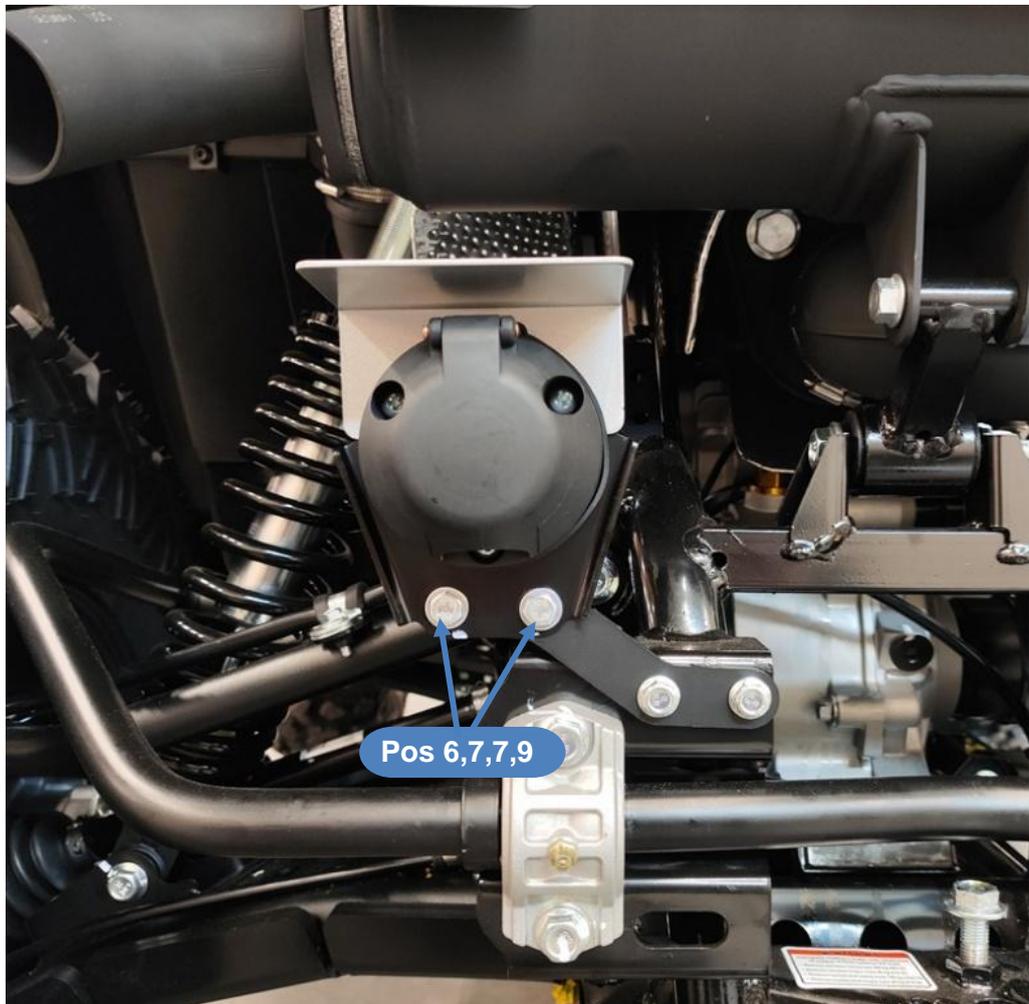

Remove original grease nipples and replace them with supplied 90 degree grease nipples.

### Step 4

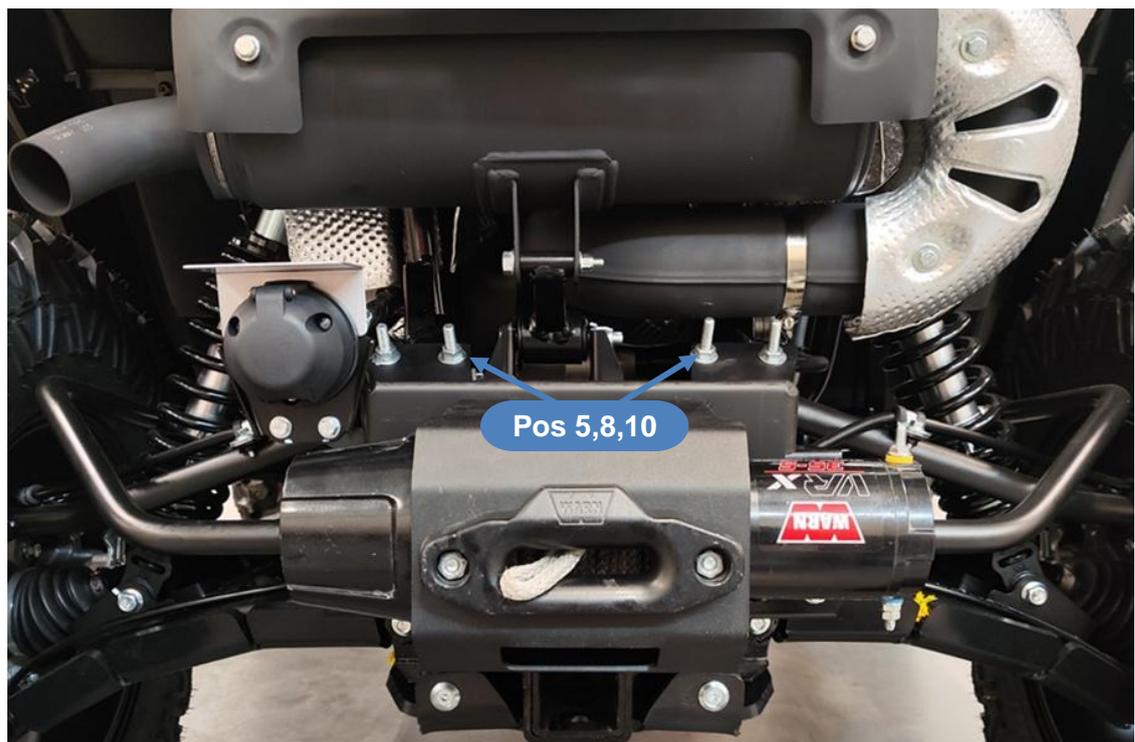

Remove trailer plug from original position and use new holder (Pos.2) to relocate the plug. Use original bolts to reattach the new holder and M6x16 bolts (Pos.6), Ø6/15 washers (Pos.7) and M6 Nyloc nuts (Pos.9) to attach plug to holder.

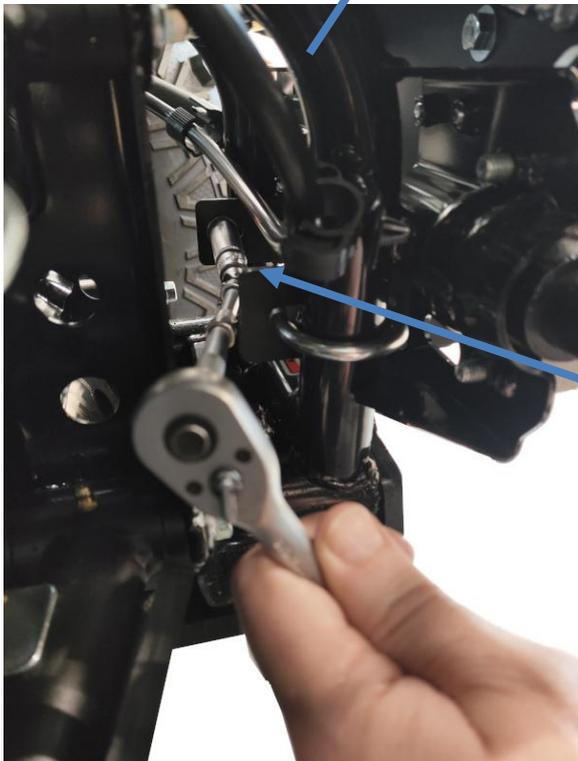

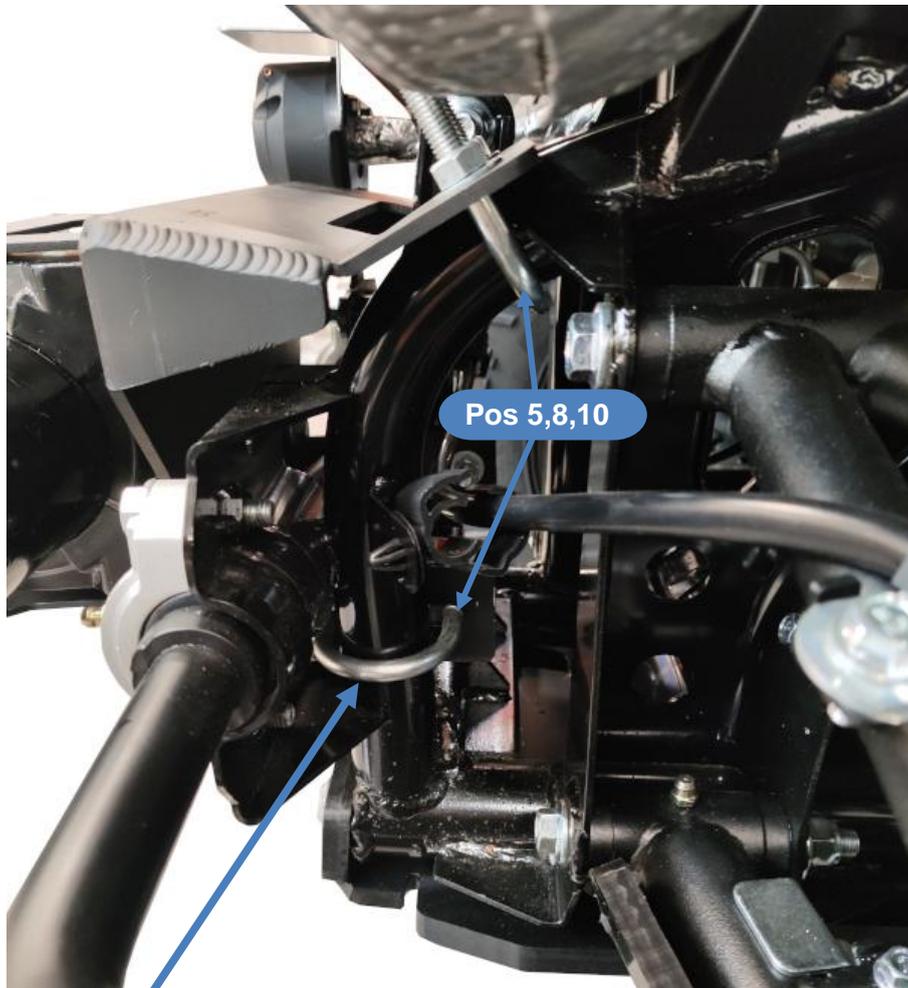

## Step 5

Place the adapter with winch to the ATV and attach all the hardware. Use M8x38 U-bolts (Pos.5), Ø8/20 washers (Pos.8) and M8 Nyloc nuts (Pos.10). For little bit easier installation, you need long extension for the socket. So you can access the lower nuts from the opposite side.
