FITTING INSTRUCTIONS

Step 1

Find suitable place where to attach control arm mounts (Pos. 2). If necessary, cut the mounts shorter. For fastening use 38mm or 50mm U-bolts (Pos. 4, Pos. 5). If it is not possible to use U-bolts, use M10x80 bolts (Pos. 8). If the threaded length of the U-bolts is not enough to properly tighten the control arm mounts, install distance plates (Pos. 3) between the mounts and the U-bolt nuts. Also use distance plates if you use M10x80 bolts for fastening. **Do not yet tighten the nuts!**

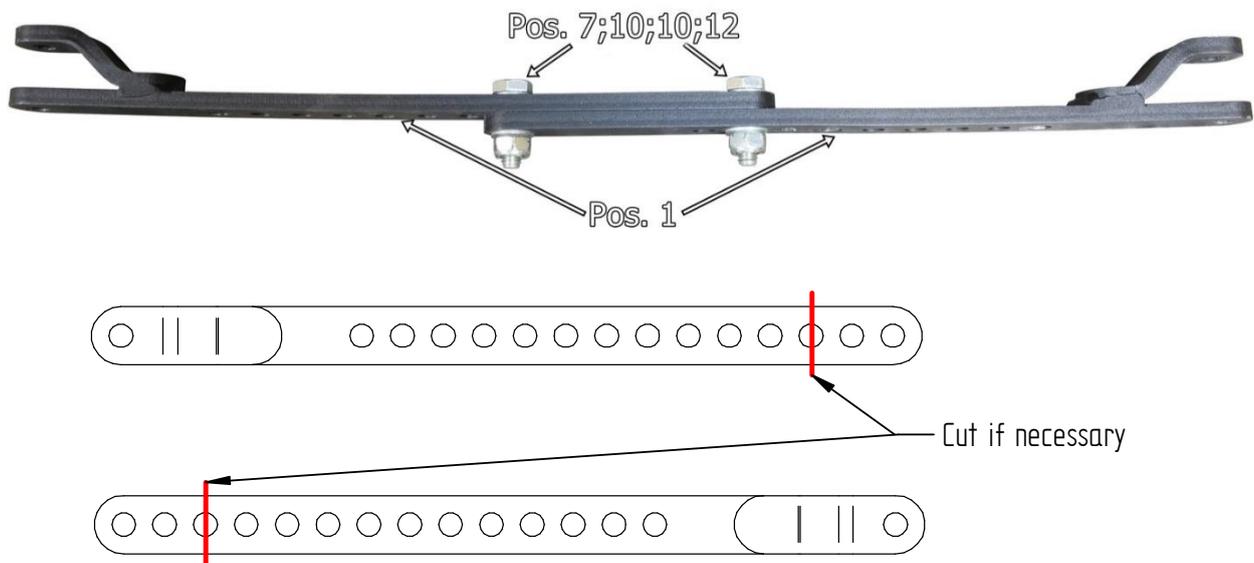

Possible mounting option

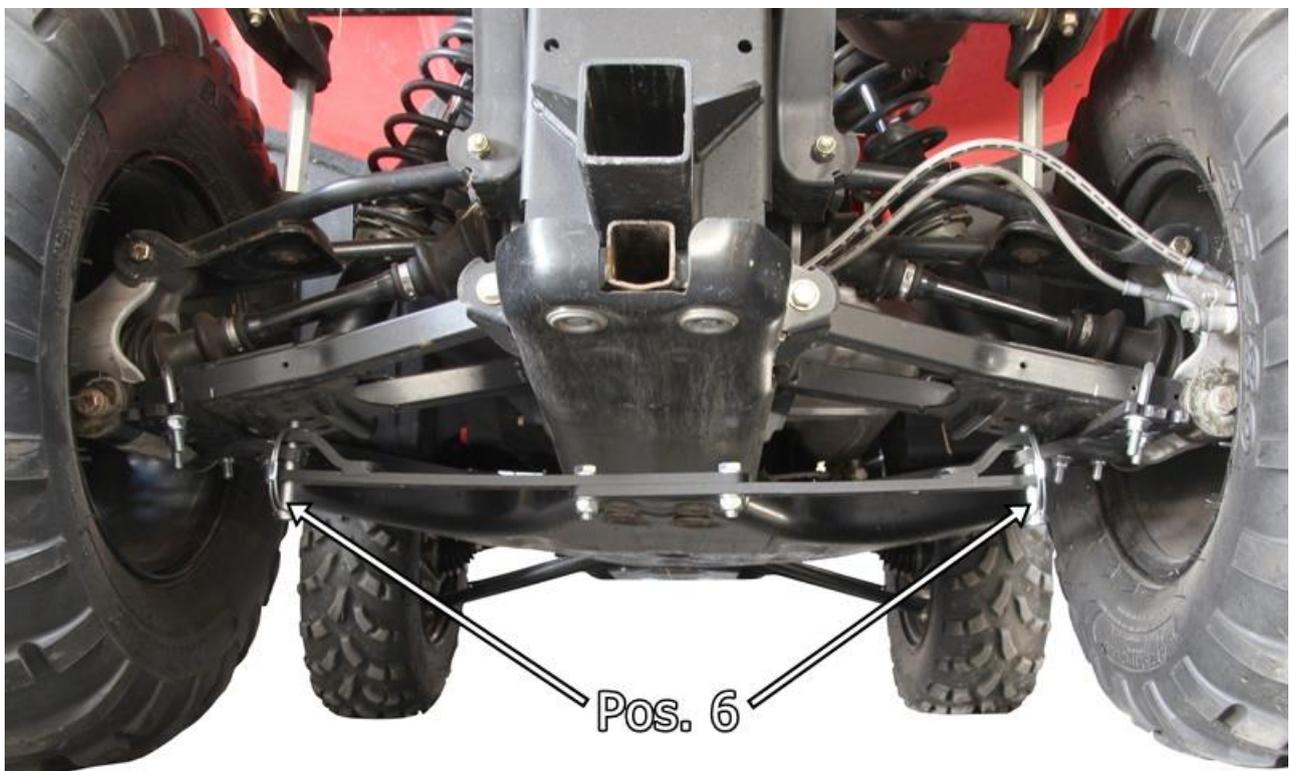

Step 2

Adjust the cross bars (Pos. 1) to needed length and bolt the cross bars together using M10x35 bolts (Pos. 7), M10 washers (Pos. 10) and M10 nyloc nuts (Pos. 12). If necessary, cut the cross bars shorter.

Step 3

Attach cross bars to the control arm mounts using spring loaded pins (Pos. 6). **Tighten the nuts of the U-bolts!** For normal driving remove the crossbars. The control arm mounts do not need to be removed.
