What will be Studied	Principles, goals and main directions of activity of international intergovernmental, regional and international non-governmental organizations, as well as organizations of the UN system in the field of information security. Modernization of the policy of international organizations in the field of information security in view of the emergence of new hybrid threats to international peace.
Why is it Interesting / should be Studied?	The hybrid nature of modern information threats has led to a change in the approaches of international organizations to information security policy and the formation of new structures to counter modern challenges to maintaining peace and stability. Currently, the problem of ensuring information security at the international level lies in the desire of individual world actors to control political processes in significant territories using information and cyber operations, which causes a fundamental problem of a constant information imbalance of power and violation of national information sovereignty.

What can you Learn (Learning Results)?	To know the nature of international cooperation, the nature of interaction between international actors, the ratio of state and non-state actors in world politics. To know and to understand the nature and dynamics of international security, to understand the features of its provision at the global, regional and national levels, to know the nature and approaches to resolving international and internationalized conflicts. To classify and to analyse the effectiveness of international organizations (UN, NATO, OSCE, BRICS); to conduct training sessions of the main bodies, specialized agencies of the UN and key international intergovernmental regional organizations in the field of information security on key issues; to determine the effectiveness of the international organizations activities; to analyse the mechanisms and main areas of cooperation between the states of the world with international organizations in the field of information security.
How to Use the Acquired Knowledge and Skills (Competencies)?	To work in an international context. To apply knowledge in practical situations. To use information and communication technologies. To analyse the nature and evolution of international organizations, their place in the system of international relations, the main forms and prospects of Ukraine's cooperation with them, strategies of international cooperation in the field of information security; to identify common and distinctive approaches to the transformation of the political activities of international organizations in the field of information policy; practically to ensure information security in the format of information hygiene and educational work with the population; to apply the skills of creating international mechanisms for countering and preventing global information confrontation, unpredictable in its consequences.
