III. DESCRIPTION OF THE EDUCATIONAL COMPONENT

1. Annotation of the educational component. This selective educational component is devoted to the study of social entrepreneurship as an innovative approach that combines business methods with solving social problems. The component reveals the principles of creating sustainable models, where the profit obtained is not the ultimate goal but a means to achieve positive social change and sustainable development.

The course program analyses the stages of a social enterprise's life cycle, from identifying an urgent social problem and developing a mission to attracting impact investments and measuring social impact. Modern business models (for example, hybrid, integration), features of personnel management, and marketing strategies in socially responsible business are also considered. Studying the component will allow applicants to acquire the skills of strategic thinking, project management, and ethical leadership necessary to build a successful enterprise that creates value for both the market and society.

2. Purpose and objectives of the educational component. This selective component aims to form the knowledge and practical skills necessary for developing and implementing socially oriented business projects. The course aims to teach students to identify current social problems, create sustainable business models, attract investments, and measure social impact, allowing them to become effective social entrepreneurs.

The educational component's objectives are to study the theoretical foundations of social entrepreneurship and form practical skills necessary for the successful implementation of social projects. In particular, this includes the ability to identify current social problems, develop sustainable business models to solve them, master methods of attracting funding, and effectively assess social impact. In addition, the course aims to develop project management skills and ethical leadership, which are key to activities in this area.

3. General Competencies

GC01. The ability to solve complex problems in the field of entrepreneurial, trade, and exchange activities based on a systematic scientific worldview and a general cultural outlook, while adhering to the principles of professional ethics and academic integrity.

GC03. The ability to work autonomously.

GC04. The ability for interpersonal interaction.

Specialized Competence

SC02. The ability to produce and justify new ideas, hypotheses, and models, and to make scientifically grounded decisions in entrepreneurial, trade, and exchange activities.

SC05. The ability for critical re-evaluation and development of modern theories, methodologies, research objects, and practices, using a systemic approach that takes into account non-economic aspects from various fields of knowledge in entrepreneurial, trade, and exchange activities.

SC06. The ability to apply modern information and communication technologies (information systems, cloud technologies, communication technologies for data transmission and exchange), instruments and equipment (including computer hardware, hardware-software complexes) necessary for innovative research, pedagogical, and professional activities in entrepreneurial, trade, and exchange structures of large scale and/or complex structure, specialized databases, and ICT tools.

Program Learning Outcomes

PLO04. To develop and research conceptual, mathematical, and computer models of processes and systems, effectively using them to obtain new knowledge and/or create innovative products in the field of entrepreneurship, trade, and exchange activities, as well as in related interdisciplinary areas.

PLO06. To make effective, ethical, and socially responsible decisions, and to ensure leadership, autonomy, and interpersonal interaction in their implementation within professional activities.

PLO07. To analyze and evaluate the status and development trends of entrepreneurship, trade, and exchange activities, applying modern methodologies, methods, and tools to solve topical problems in professional practice.

PLO10. To initiate, develop, and implement scientific and/or innovative projects that enable the re-evaluation of existing knowledge and/or the acquisition of new holistic knowledge, solving problems in entrepreneurship, trade, and exchange activities while taking into account ethical, social, economic, environmental, and legal aspects.

4. Structure of the educational component.

Names of content modules and topics	Just	Lek	Practice	By oneself. Rob.	Cons	*Form Control/ Ball
Content module 1. Strategic approaches to social business						
Topic 1. Hybrid Business Models in Social Entrepreneurship: Combining Commercial Sustainability and Social Mission.	25	2	2	20	1	RZ/K, O, WED / 16 points

Topic 5. The role of social entrepreneurship in solving environmental problems.	26	2	2	20	2	RZ/K, O, WED / 16 points
Total by module 2						32 points
Final test work						RPC / 20 points
Total Hours / Points	120	10	14	88	8	max 100 points

Form of control: O – survey, RZ/K – solving practical problems, cases, SR – independent work of the applicant, RMG – work in small groups, PKR – final control work.*

5. Tasks for self-study.

Independent work is a form of organising the educational process in which students perform the planned tasks independently under the methodological guidance of the teacher. The tasks of independent work offered to students include: Study of lecture material. Work with recommended literature. Preparation for practical classes, work in small groups, and testing. Control test of knowledge by questions for self-control.

IV. EVALUATION POLICY

Class Attendance Policy: Class attendance is mandatory. Students must comply with the deadlines set for the performance of all types of work provided for by the syllabus.

Training can take place during this period online or according to an individual plan in agreement with the teacher for objective reasons (e.g., illness, international internship, participation in scientific events, etc.).

The student must diligently perform tasks and actively participate in the educational process.

Policy on the enrollment of the results of formal, non-formal and informal education is determined by the Regulation on the Recognition of Results Obtained in Formal, Non-Formal and/or Informal Education into Lesya Ukrainka Volyn National University.

The policy on academic integrity is outlined by the Regulation on the System for the Prevention and Detection of Academic Plagiarism in the Scientific and Educational Activities of Higher Education Applicants, Doctoral Students, Scientific, Pedagogical and Scientific Workers of Lesya Ukrainka Volyn National University and the Code of Academic Integrity of Lesya Ukrainka Volyn National University

Deadline and retake policy: if the student did not attend separate classroom classes (for good reasons), at the consultations, he has the right to work out the missed classes and get the number of points determined for the missed topics.

Policy on additional (bonus) points: students can be awarded additional (bonus) points, which are counted as the results of current control of a maximum of 15 points for the following types of work: published scientific article in professional journals of Ukraine or peer-reviewed foreign journals – 10 points; publication of abstracts – with a speech at the conference – 5 points, without a speech – 3 points; preparation and participation in the all-Ukrainian stage of subject Olympiads, all-Ukrainian and international competitions of student scientific works – 7 points; victory in the All-Ukrainian

stage of subject Olympiads, All-Ukrainian and international competitions of student scientific works – 15 points; submission of project applications for participation in student exchange programs, scholarship programs, summer and winter schools, etc. – 7 points.

V. FINAL CONTROL

The semester credit is given to students based on the results of all types of planned educational work on a 100-point scale. On the test date, the teacher writes down in the statement the sum of current points that the student has scored during the current work (scale from 0 to 100 points).

If an education applicant has scored less than 60 points during his current work, he takes a credit during the liquidation of academic debt. In this case, the points scored during the current assessment are cancelled.

Retaking the final control of the educational component is carried out as a written answer to one theoretical question (30 points) and the solution of two situational exercises (35 points each). The maximum score for the test is 100 points.

The schedule of the educational process establishes the terms of the final semester control.

List of questions for the test

1. What is social entrepreneurship, and how does it differ from traditional business?

VI. GRADING SCALE

Evaluation of the final control results in the form of a test is carried out in the manner prescribed by the system of knowledge control adopted at the University on a 100-point scale, with transfer to linguistic assessment.

Score in points	Linguistic assessment
90 – 100	Zarakhovano
82 – 89	
75 81	
67 74	
60 66	
1 – 59	Not credited (retake required)

Criteria for evaluating learning outcomes:

60-100 points (enrolled): The applicant has the conceptual and factual apparatus of the educational component to the extent necessary for further training and future work in the speciality, can perform the tasks provided for by the syllabus, is familiar with the primary recommended literature; when performing tasks, mistakes are made, but the applicant demonstrates the ability to eliminate them.

1-59 points (not enrolled): The applicant has the conceptual and factual apparatus of the educational component at the elementary level, but the theoretical content of the course has not been mastered, the necessary practical skills have not been formed, and most of the tasks provided for by the syllabus have not been completed or contain gross errors.
